Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

1. **Claims 1-3, 6, 10, 13-15, 19, 22, 24, 28 and 33 are rejected under 35 U.S.C. 102(B) as being anticipated by Ruegg (US Patent 3,875,349).**

Claims 1-3, 6, 10, 13-15, 19, 22, 24, 28 and 33 are rejected for the same reasons presented in the Non-Final Office Action filed 05 June 2006, and incorporated herein by reference, as the instant amendments fail to further limit the claims as shown below in the *Response to Arguments* section.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. **Claims 1 and 7-9 are rejected under 35 U.S.C. 103(a) as being unpatentable over Killion et al. (US Patent 5,524,056) in view of Ruegg.**

Claims 1 and 7-9 are rejected for the same reasons presented in the Non-Final Office Action filed 05 June 2006, and incorporated herein by reference, as the instant

Art Unit: 2615

amendments fail to further limit the claims as shown below in the *Response to Arguments* section.

3. Claims 1, 4, 5, 11, 12, 19-23, 25, 27 and 28-32 are rejected under 35 U.S.C. 103(a) as being unpatentable over Hagen et al. (US Patent 6,389,142).

Claims 1, 4, 5, 11, 12, 19-23, 25, 27 and 28-32 are rejected for the same reasons presented in the Non-Final Office Action filed 05 June 2006, and incorporated herein by reference, as the instant amendments fail to further limit the claims as shown below in the *Response to Arguments* section.

Allowable Subject Matter

The following is a statement of reasons for the indication of allowable subject matter:

4. Claims 16-18 and 26 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claim 16-18 and 26 are allowable for the same reasons presented in the Non-Final Office Action field 05 June 2006, and incorporated herein by reference.

Response to Arguments

Applicant's arguments with respect to claims 1-3, 6, 10, 13-15 19, 22, 24, 28 and 33 have been considered but are moot in view of the new ground(s) of rejection. It is noted that the instant amendment rendered each independent claim—1, 19, 22 and

Art Unit: 2615

28—to require an error signal generated in response to signals from both a first and second microphone. The applicant posits that such a requirement differentiates over the prior art since all art of record produces an error signal from a first or second microphone in a non-simultaneous manner; however, the examiner respectfully disagrees. Although each independent claim generates an error signal based on signals from both microphones, there is no language in the claims requiring that such generation occurs through simultaneous consideration of first and second microphones signals. The current language, in effect, fails to further limit the scope of the claims as previously presented. Therefore, all rejections are maintained.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of

Art Unit: 2615

the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
